### DETAILED ACTION

1. **Please Note:** In an effort to enhance communication with our customers and reduce processing time, Group 1640 is running a Fax Response Pilot for Written Restriction Requirements. A dedicated Fax machine is in place to receive your responses. The Fax number is 703-305-3704. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Paula Hutzell, Supervisory Patent Examiner at Paula.Hutzell@uspto.gov or 703-308-4310. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

#### 2. *Election/Restriction*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 147-148 and 151-153, drawn to method of obtaining a composition which comprises determining whether a chemical compound binds a human Y4 receptor expressed on the surface of a mammalian cell transfected with a vector adapted for expressing the vector in the cell, classified in class 435, subclass 7.21.
- II. Claims 149 and 151-153, drawn to method of obtaining a composition which comprises determining whether a chemical compound binds to and activates a human

Y4 receptor expressed on the surface of a mammalian cell transfected with a vector adapted for expressing the vector in the cell, classified in class 435, subclass 7.21.

- III. Claims 150 and 151-153, drawn to method of obtaining a composition which comprises determining whether a chemical compound binds to and prevents activation of a human Y4 receptor expressed on the surface of a mammalian cell transfected with a vector adapted for expressing the vector in the cell, classified in class 435, subclass 7.21.

The inventions are distinct, each from the other because of the following reasons:

The methods of Inventions I-III are distinct because they are independent, using separate method steps, and having different effects.

Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper. A search of the art for Inventions I-III would not be co-extensive with each other. Because the searches required for these inventions are not co-extensive an examination of the materially different, patentably distinct inventions in a single application would constitute a serious burden on the examiner.

An election to prosecute one of the groups listed I-III must be made. Affirmation of this election must be made by applicant in responding to this Office action.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1646

amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
